An Emergent Mosaic of
Wikipedian Activity

Bruce W. Herr and Todd M. Holloway
School of Library and Information Science
Department of Computer Science
Indiana University
Bloomington, IN 47405, USA
[bherr,tsholloway@indiana.edu]

INTRODUCTION
This emergent mosaic supplies a macro view of all of the English Wikipedia (http://en.wikipedia.org) and reveals those areas that are currently 'hot', meaning, of late, they are being frequently revised.

ARTICLE NETWORK
The provided dataset [1,2] comprises 659,388 interconnected Wikipedia articles. One article (node) is connected to another if it links to it. There are 16,582,425 links.

POSITIONING
Articles are shown close to one another if they are similar, and far apart if they are different. Two articles are said to be similar if articles that link to one often link to the other.

MOSAIC
The 1,869 images were taken directly from Wikipedia. This represents about one image for every 300 articles. The images were selected automatically by ranking the articles above each tile by in-degree and using the first image of the highest ranked article. Only icons were filtered. All images of controversial subject matter were kept, making it appropriate for mature audiences.

'HOT' AREAS
From Feb. 6, 2001 to April 6, 2007, articles were edited 52,300,922 times. The red, larger nodes are those articles that have been revised more frequently than those shown as small, yellow, nodes. We gave more consideration to current and major revisions. The result is a map revealing articles which have been furiously revised lately.

Top 20 Most Actively Revised Articles

1. Jesus
2. Adolf Hitler
3. October 2003
4. Nintendo revolution
5. Hurricane Katrina
6. India
7. RuneScape
8. Anarchism
9. Britney Spears
10. PlayStation 3
11. Saddam Hussein
12. Japan
13. Albert Einstein
14. 2004 Indian Ocean Earthquake
15. New York City
16. Germany
17. Muhammad
18. Pope Benedict XVI
19. Ronald Reagan
20. Hinduism
